

# FPi-2000

## FOLDER/INSERTERS

**SAY GOODBYE TO THE TEDIOUS AND STRESSFUL TASK OF HAND-FOLDING, COLLATING, AND INSERTING INVOICES OR BROCHURES. THE **FPi-2000** SERIES OF TABLETOP MAIL FOLDER/INSERTERS WILL WIN YOU OVER WITH THEIR EASE OF OPERATION AND RELIABILITY.**

A neat, clean fold transforms any document into a professional-looking brochure. Adding an insert to a letter creates a more effective mail piece. The **FPi-2000** series of tabletop mail folder/inserters quickly and easily gets business letters, advertising mailings, invoices, and other documents into the mail — with or without enclosures. The fold function can fit documents of various sizes into #10 or 6"x 9" envelopes. Every kind of commonly-used fold can be selected to quickly produce brochures or flyers: single-fold, Z-fold, double-parallel, or C-fold. The insert function easily adds small formats, pre-folded materials, reply cards, or return envelopes to letters for efficient and effective mail packages.

# FPI-2000

## FOLDER/INSERTERS

### KEY ADVANTAGES

Folding/Inserting equipment can automate a very time-consuming part of your mailroom process by providing an efficient, cost-effective, and more professional way to prepare your mail package materials. Designed for small to moderate quantities of mail, the **FPI-2000** tabletop series is attractive, fast, and extremely simple to use. Up to three automatic feeder stations provide maximum versatility and capacity — they quickly and quietly perform a variety of applications, from daily miscellaneous mail to multi-part mass mailings.

#### DAILY MAIL FUNCTION

Each model includes a manual feeder for handling daily mail. It enables the operator to feed up to five sheets of paper (loose or stapled) by hand and add an automatically-fed enclosure if desired.

#### FEEDER-SWAP

Inserters equipped with more than one document station can be set up for uninterrupted operation when processing high-volume, single-item mailings with or without enclosures. When one station empties, the other station starts automatically, enabling the first to be refilled without pause.

#### MULTI-PAGE FEEDS

Each automatic document station can be set to feed several sheets per envelope. Feed, fold, and insert up to three sheets per job, or up to five sheets when using OMR.

### STANDARD FEATURES

#### Fill & Start

Enables anyone to operate the system without special training. Simply select desired functions and let the machine complete all necessary material measurements and adjustments before starting the job. Settings for specific tasks can be saved in the programmable nine-job memory.

#### Real Sheet Control

The safest and most reliable double-feed detector in this inserter class. Performs an actual measurement of paper thickness, eliminating false double-feed messages that document colors and printing can produce with optical detecting sensors. The automatic double-feed detector can be turned off for specific jobs or in each individual feeder.

### Five-in-One Folding

A sturdy, quiet folding mechanism neatly folds up to five sheets of material in varying sizes — loose or stapled.

### Easy Access

A hinged lid enables easy access to the interior of the inserter. Should a paper jam occur, the document can be quickly and cleanly retrieved undamaged.

### Interactive Display

The user-friendly control panel displays folding and inserting functions for push-button selection. Parameters for up to nine different jobs (settings for document composition, type of fold, fold location, document alignment, address location) can be saved and automatically retrieved.

## COMPONENT OPTIONS

### OMR

Automatic Optical Mark Recognition (OMR). The inserter can “read” coded marks on documents to reliably determine the number and sequence of documents intended for a single addressee. This is especially useful for mailing multi-page invoices.

### High-Volume Envelope Hopper

Eases the collection of finished envelopes. The time- and space-saving design delivers filled envelopes to an extra-large, side-mounted envelope hopper.

### Side Exit Tray

Enhance the professional image and efficiency of all your mailings. The side exit tray automatically connects to the FP **ultimail™** digital mailing system for easy collating and stacking.

## SYSTEM SPECIFICATIONS

### DOCUMENT FEEDER

Document Width	5.1" to 9.0"
Document Height	3.5" to 14.0"
Paper Quality	15.0 lb. to 62.5 lb. (coated/uncoated)
Capacity	325 sheets per station
Sheets/Weight with Multiple-Feed	5 sheets (20.0 lb.) with enclosure

### SUPPLEMENT FEEDER

Small Formats	5.5" to 9.5"
Pre-Folded Supplements	3.5" to 6.3"
Capacity	Up to 325 single-sheet supplements (20.0 lb. paper)

### ENVELOPES (with or without addresses; windows)

Sizes	#10 or 6" x 9"
Capacity	150 envelopes

### FOLDING AND INSERTING PERFORMANCE

Folding	5 sheets maximum
Inserting	2,200 letters/hour (max)

### GENERAL

Fold Types	Single-fold, Z-fold, double-parallel fold, or C-fold (l to r)
Programmable Job Memory	9
Dimensions	16.5"w x 20.0"h x 47.0"l
Weight (FPi-2020)	165 lbs.
Certification	C, IEC 60950
